

Karwan Sorani

Master of Computer Science Engineer

Address: Sibeliusgången 14, 164 73 Kista

Home page: <http://www.sorani.org>

E-mail: Karwan@sorani.org

Tel: +46 735 696 225

PROFILE:

A master of Computer Science Engineer specialized in Telecommunication technology. Has also a wide range of experience in other computer technologies. Prefer work in Programming, Media/Web design, computer security and researching in telecommunication. Able to work on own initiative as well as a part of a team.

Proven analytic, design and problem solving skills involving managing and motivating teams to achieve their objectives.

MAJOR ACHIEVEMENTS:

- Developed several professional Webb pages for commercial business using advanced Technologies.
- Developed several applications of electronic business communication using existing infrastructure for security.
- Developed and implemented a platform that can be used for communication via IP and SNMP among several nodes.
- Working with network security to provide the customers protect against the threats of Internet crime.
- Implemented a transition mechanism that can be used in a hybrid communication network (Ipv4/ipv6) and also researched other transition mechanisms.

EXPERIENCE:

- 2004- I worked as Media Assisten in the External Relations Department at the International Organization of Migration (IOM), my duties involved monitoring Swedish press and translate relevant articles from Swedish to English, updating of web pages. (Company: International Organization of Migration)
- 2004- I have started a new internet company "Sorani media"; the company offers customer oriented and professional web pages, e-commerce, flash pages, banner and updating of web pages. More about Sorani media can be founded at <http://www.sorani.se>. (Company: Sorani media)

- 2003- Working as technical translator and interpreter from Swedish to English.
Developing several professional web pages using technologies such as ASP, SQL, JSP, and Jscript (Company: DynPro Sweden AB).
- 2001- Working as system developer and working with internet security communication issues and developing several professional web pages; using technologies such as ASP, SQL, JSP, and JScript (Company: Internet Express Scandinavia).
- 2001- Working in a consulting firm, I developed several applications using Java and SQL (Company: Softronic konsult AB)
- 2000- Working with Client Support within the network security issues both in Sweden and UK. Controlling and monitoring of customer's intranet and prevent it from any possible attack (Company: Defcom AB).
- 2000- Researching and implementing of a transition mechanism for a mixture networks and implementation of application using SIP protocol, for this purpose I used C as programming language (Company: Nortel networks)
- 1999- Implement a platform for communication used SNMP, (Company: Ericsson Radio Access AB).
- 1998- Test CDU-card, which is used in base station in mobile phones (Company: standard Radio).

COMPUTING SKILLS:

Operative Systems:	Solaris, Linux, BSD, Windows
LANGUAGE:	C, Java, JavaScript, Visual Basic, HTML, ASP, JSP, Flash, ASP.NET, C#.
DATABASE:	MS SQL, MS Access.
TOOL:	Visual Studio .NET, Emacs. Jbuilder, Adobe Photoshop, illustrator, Page Maker.
HTML EDITOR:	Dreamweaver MX, FrontPage, Visual Studio.

OTHER SKILLS:

Can speak several languages fluently: Swedish, English and Arabic.

QUALIFICATIONS:

Master of Computer Science in Telecommunication at the Royal Institute of Technology.

Diploma in data security at a data security company Defcom.

Various courses in programming at Department of Computer and Systems Sciences.

PERSONAL DETAILS:

Marital Status: Single.
 Driving License: Full, clean
 Citizenship: Swedish

INTERESTS:

Music, Soccer, physical fitness - gym.

LETTER OF APPRECIATION:

I received the following Letters:

- Letter of Appreciation from the International Organization of Migration (IOM), 2005.
- Letter of Recommendation from Infosys, 2004.
- Letter of appreciation from Internet Express Scandinavia, 2001.
- Letter of Recommendation from Nortel Networks, 2001.
